

25 August 2026

FOI Ref 23303

Request - You asked Staffordshire Police (SP) the following:

i wanted to make a request under the freedom of information in relation to the number of road traffic related incidents that have occurred in Featherstone Lane, Shareshill, Wolverhampton and the types of incidents that have occurred in the lane i.e. minor collision, serious collisions, road blocked due to the number of cars using it etc.

I use the lane to visit my horse on a daily basis and the number of accidents that have happened along the lane including the huge increase of cars using the very barrow lane as a cut through is becoming dangerous.

Before i approach my local MP and the council about this matter i wanted to know how many vehicle related incidents have been reported in the lane including both 999 and 101 calls that your officers did not attend. I am trying to establish how much of an issue the lane has.

SP received your request on 25/08/2026 and have processed this under the Freedom of Information Act (FOIA).

SP's response to your enquiry is as follows:

Please note:

- this data has been retrieved from a search of our incident recording system between 01/01/2016 and 25/08/2026 for the location requested where the call type description was recorded as a road traffic collision or traffic offence.
- these figures have been provided to the best of the ability of SP, subject to the limitation of current recording protocols and systems and software. Additional incidents may have been recorded during these timescales but are awaiting finalisation and input onto these systems and would not be present within this dataset.
- Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that data is extracted from multiple sources, developed for specific policing

purposes, for which data extraction methods have not been specifically designed to directly correlate with the terminology of this request. Therefore, the data presented is subject to the inaccuracies and idiosyncrasies inherent in any large-scale recording system. Consequently, care should be taken in the interpretation and presentation of this data, to not misrepresent the whole or any part of the data disclosed.
